

Recreational Vehicle owners:

Protect Your Recreational Vehicle!

Before you install a generator, heat pump or alter any of the recreation vehicle's systems, whoever is actually going to do the alteration must obtain an alteration permit from the nearest Labor and Industries office.

Examples of alterations requiring inspection include:

- **Installing a heat pump or air conditioning**
- **Installing a generator or gas furnace**
- **Electrical or plumbing changes**

Failure to obtain a permit and inspection could affect:

- **The safety of your recreational vehicle**
- **Your ability to sell your recreational vehicle**
- **Your ability to collect on insurance claims**

Play it safe — give us a call BEFORE you alter a recreational vehicle and let us help you!

Find your nearest L&I field office for more information
using the phone book or our web site at
